Overview

"Hands-on AI / AIOps for Business Innovators: Unlock the Power of Intelligent Automation (For Non-Technical Users, Business Edition)" is a dynamic, hands-on course designed specifically for business professionals new to AI and machine learning who want to stay ahead of the curve and leverage the latest advancements in AI. You'll learn how AI can help drive your organization forward and learn how to apply AI to improve business operations, increase efficiency, and drive growth. The course will provide you with an understanding of intelligent automation and its applications in various business areas such as sales, finance, and operations. Throughout the course, you'll explore hands-on exercises using real-world data and popular AI and machine learning tools and will learn how to identify potential areas for automation in your own organization. You'll also explore use cases for AI in various business areas such as customer segmentation, lead generation, and sales forecasting. You'll also learn about the best practices for implementing AI and machine learning projects in an organization and the ethical considerations that come with it. Throughout the course, you'll have the opportunity to work with real-world data and use popular AI and machine learning tools to gain hands-on experience with the technology. The hands-on labs are designed to give non-technical and non-developer participants practical experience working with AI and machine learning tools, using interactive tools that do not require programming experience or technical knowledge. The labs will use real-world data examples that are relevant to the participants' industries or areas of interest.
