**Price:** 3995

**Duration:**

**Delivery Methods:** Virtual

## Overview

The ACE Level 2 course is designed to build upon the foundation in networking and Arista EOS established in Level 1. Engineers will focus on the Arista Universal Cloud Network (UCN) model for Layer 2 Leaf-Spine topologies leveraging MLAG and VARP. This same architecture is presented within the Arista Cognitive Campus architecture. The course will also introduce the Arista WiFi portfolio and features along with Campus specific features such as PoE. Engineers will then learn how the Arista DMF solution allows organizations to monitor a network-wide deployment. Audience Profile :- The ACE Level 2 course is best suited for individuals with more than 2 years of experience in the Network Engineering Field and looking to establish the core skills that Arista Customers desire. Frontline Network Engineers and Operations staff will find the skills most often searched for by corporations for these positions. Engineers looking to cross over from siloed skillsets in networking and wanting to embrace the whole network to include DC, Campus and monitoring will grow their relevance to modern architectures. Those individuals holding current or expired Associate certifications in other vendor programs will find a refreshed and updated approach. ACE:L2 focuses on the features and skills needed in every network. You will not waste energy learning outdated technologies, approaches or tasks no longer used in open networks. All topics are used daily within every Arista Customer network.
