## Overview

Welcome to the Certified Network Principles (C)NP) Introduction course. Designed for aspiring and current IT professionals, this course offers a deep dive into the essential aspects of network design, deployment, and management.

You'll learn the fundamentals of network architectures from wireless systems to server-based setups, ensuring you can navigate and optimize both traditional and modern infrastructures.

Throughout the course, we explore critical technologies like the TCP/IP and OSI models, and dive into advanced concepts such as virtual networks and Software-Defined Networks (SDN), which are pivotal in today's cloud-driven environment. Practical lessons on switches, routers, and wireless communication, including Bluetooth, will equip you with the skills needed to manage an organization's network effectively.

This course prepares you not only for the C)NP exams but also for the CompTIA Network+ certification, enhancing your credibility as a network specialist capable of ensuring robust, secure network operations.
