## Overview

### Description

#### Overview

This three-day course provides participants with a solid foundation of PMI's project management methodology, using PMI's Process Group: a Practice Guide (2023) and A Practice Guide, and A Guide to the Project Management Body of Knowledge Sixth Edition as the source materials to create and track a realistic plan. Participants will choose a real-world project taken directly from their industry, and apply the PMI processes involved in initiating, planning, executing, monitoring, controlling, and closing a project. Participants will engage in numerous discussion groups focusing on best practices, as well as complete numerous templates for their real-world projects.

Participants take all electronic templates and completed exercises with them after the class. This course is designed for project managers, project team leaders, and team members transitioning into project manager or project team leader roles.

While PMI has released a PmBOK seventh edition text, this course is intentionally based on the 6th edition text (as that text is more "process" oriented than the 7th edition, which is more "leadership" oriented).

This course is approved for PDU credits with a PMI course number – ask your Learning Consultant for more information if you are looking to take this course for PDU credit with PMI.
