

Mastering React Developer Boot Camp (TT4195)

Price: 2695

Duration: 5 days

Delivery Methods: Virtual

Overview

React is one of the most valuable and widely used tools for building fast modern web applications, and learning it can open the door to exciting new roles and projects. In this engaging five day expert led course, you will work through practical labs and real world exercises designed to help you build confidence and apply React skills right away. From setting up projects and creating components to working with advanced features like custom hooks, state management, server side rendering, and TypeScript, you will gain the ability to build polished and responsive web applications that meet today's development standards.

You will develop practical skills that let you manage data flow with hooks, connect to external APIs, create dynamic and reliable forms, and handle authentication with tools like JWT, Okta, and Auth0. You will explore how to improve performance through code optimization techniques like lazy loading and code splitting, and learn to write meaningful unit tests and debug your work with the right tools. The course also covers popular alternatives for state management and data fetching, giving you a broad set of techniques you can apply in the real world. Throughout, you will work on projects that reinforce your learning, with expert guidance available every step of the way to help you solve problems and build confidence.

This course is designed for web developers who have basic JavaScript experience and want to strengthen or expand their React knowledge with extended intermediate topics. It is a great fit for front end developers, full stack developers, or software engineers looking to become job ready with React or align their team practices around modern workflows. Whether you are new to React or

eager to deepen your understanding, you will leave this course with practical skills, real world experience, and the confidence to apply React effectively on the job.

NOTE: For basic level web developers who need more of an introductory-level course, you might consider the 3 day Getting Started with React Basics as an alternative.

Audience Profile

The ideal audience for this boot camp includes front-end developers, full-stack developers, and software engineers looking to deepen their React skills and build high-performance web applications.

Attendees should have incoming hands-on experience working with JavaScript, HTML, and CSS, along with some experience building simple web apps or working with front-end frameworks. Ideal roles include Web Developers, UI/UX Engineers, and Full-Stack Developers who want to master modern React practices and implement real-world projects.

Prerequisites

This course introduces React, but requires real-world web development experience. Web developers should have practical experience working with JavaScript, ready to strengthen and expand their abilities with React. It is well suited for front end developers, full stack developers, and software engineers who want to build modern, scalable applications using current React practices and tools. The course offers an expert led learning experience that blends foundational instruction with extended intermediate coverage, helping you grow your skills and apply them confidently on real projects.

Before attending, you should have practical experience building web applications and a strong working knowledge of JavaScript.

Here are important skills to bring with you:

Proficiency with JavaScript concepts such as functions, arrays, objects, and asynchronous operations.

Hands on experience using a code editor such as Visual Studio Code for web development projects. A clear understanding of how HTML and CSS work together to structure and style web applications.

Take Before: In order to gain the most from this course, you should have incoming skills equivalent to those in the course listed below, or should have attended this as a prerequisite: This course is not for beginners.

Why Professionals Choose TOPTALENT?

Dedicated Texas-Based Support

Get assistance every step of the way from our **Texas-based team**, ensuring your training experience is hassle-free and aligned with your goals.

3000+ Curated Professional Courses

Access an extensive portfolio of over 3000 courses across IT, Business Application and Leadership – Designed to meet evolving Industry demands

95% Client Approval Rating

Trusted by professionals nationwide our 95% approval rating reflects consistent quality, measurable impact and exceptional service.

Certified Industry Instructor

Learn from professionally certified experts with real world experience and a proven commitment to learner success.

FAQ

What if I have to reschedule my class due to conflict?

Ten (10) business days' notice is required to reschedule a class with no additional fees. Notify TOPTALENT LEARNING as soon as possible at 469-721-6100 or by written notification to info@toptalentlearning.com to avoid rescheduling penalties.

How do I enroll for this class?

Please contact our team at 469-721-6100; we will gladly guide you through the online purchasing process.

What happens once I purchase a class?

You will receive a receipt and an enrollment confirmation sent to the email you submitted at purchase. Your enrollment email will have instructions on how to access the class. Any additional questions our team is here to support you. Please call us at 469-721-6100.

What is your late policy?

If a student is 15 minutes late, they risk losing their seat to a standby student. If a student is 30 minutes late or more, they will need to reschedule. A no-show fee will apply. Retakes are enrolled on a stand-by basis. The student must supply previously issued courseware. Additional fees may apply.

What happens when I finish my class?

You will receive a 'Certificate of Completion' once you complete the class. If you purchased an exam voucher for the class, a team member from TOPTALENT LEARNING will reach out to discuss your readiness for the voucher and make arrangements to send it.
