

Planning and Managing Agile Projects

Price: 1795

Duration:

Delivery Methods: Virtual

Overview

This 3-day course aims at introducing its attendees to the core values, principles, and practices of Agile. This course is a more elaborate version of the Certified Scrum Master training as it discusses how to plan and manage Agile practices, not only those in Scrum. The course also goes into greater depth about all the roles and responsibilities on the team and not just the ScrumMaster and Product Owner roles. The use of agile as an approach to managing projects has been increasing dramatically over the last several years. Gartner predicts that by the end of 2012, agile development methods will be used on 80% of all software development projects. PMI's research has shown that the use of agile has tripled from December 2008 to May 2012. Therefore, PMI has developed a new certificate called the Agile Certified Practitioner (ACP). The PMI-ACP is positioned to recognize and validate knowledge of this important approach. The course outline is aligned with the new PMI Agile Certified Practitioner (PMI-ACP) certification credential that we anticipate will become a worldwide accepted standard for best practices for Agile PM like the PMBOK Guide and PMP recognition is for PM. This course is intended for Managers, Executives, Project Managers, Business Analysts, Business and IT stakeholders working with analysts, Quality and process engineers, technicians, managers; supervisors, team leaders, and process operators.
