

AI Image Prompting with Copilot and ChatGPT

Price: 245

Duration:

Delivery Methods: Virtual

Overview

Artificial intelligence (AI) tools can be used in a business setting to create images that are unique, high quality, and cost effective. In response to your written prompt describing what you require in an image, these tools can quickly produce art, illustrations, diagrams, sketches, graphical concepts, and a wide range of other images, enabling you to save time and money designing and developing new graphic concepts, custom images, and product designs.

Course Objectives:

In this course, you will generate images effectively using AI tools. You will:

- Select and use a generative AI tool to create images from text prompts.
- Describe your desired content and style sufficiently for a generative AI tool to produce the image you want.
- Use AI image-generation tools effectively and ethically within a business context.

Target Student:

This course is designed for people who want to develop the skills needed to put generative AI-based image-generation tools to work in their own tasks and workflows.
