Overview

About this Course

In this 5-day course, professional web developers will learn to develop advanced ASP.NET Core MVC applications using .NET tools and technologies. The focus will be on coding activities that enhance the performance and scalability of the Web site application.

Audience Profile

This course is intended for professional web developers who use Microsoft Visual Studio in an individual-based or team-based, small-sized to large development environment. Candidates for this course are interested in developing advanced web applications and want to manage the rendered HTML comprehensively. They want to create websites that separate the user interface, data access, and application logic. The server-side development will use the C# language, and is an excellent follow-on course to our Programming in C# course. The client-side development will make use of JavaScript, CSS and HTML5.
